CONTENTS VOLUME 60 MARCH 1983

page 1 SHOEMAN, R. L., NEUHAUS, G. AND SCHWEIGER, H.-G. Gene expression in *Acetabularia*. III. Comparison of stained cytosolic proteins and *in vivo* and *in vitro* translation products

13 NAIB-MAJANI, W., OSBORN, M., WEBER, K., WOHLFARTH-BOTTERMANN, K.-E., HINSSEN, H. AND STOCKEM, W. Immunocytochemistry of the acellular slime mould *Physarum polycephalum*. I. Preparation, morphology, and reliability of results concerning cytoplasmic actomyosin patterns in sandwiched plasmodia

29 GELLER, R. L. AND LILIEN, J. Repair of a calcium-dependent adhesive mechanism of embryonic neural retina cells: kinetic and molecular analysis

51 FUJISHIMA, K. Microspectrophotometric and autoradiographic study of the timing and duration of pre-meiotic DNA synthesis in *Paramecium caudatum*

67 RAHA, S. AND WESEMANN, W. Effects of endotoxin treatment on the differentiation of guinea pig megakaryoctyes to blood platelets

89 DE BONO, D. AND GREEN, C. Interaction between vascular endothelial cells and vascular intimal spindle-shaped cells *in vitro*

103 VITHANAGE, H.I.M.V., CATT, J.W., CALLOW, J.A., CALLOW, M.E. AND EVANS, L.V. Fertilization in brown algae. IV. Appearance of sperm-specific antigens on fertilized eggs

109 BELL, P.R. Nuclear bodies in the maturing egg cell of a fern, *Pteridium aquilinum*

117 BRADLEY, T.J. Functional design of microvilli in the Malpighian tubules of the insect *Rhodnius prolixus*

137 HUFNAGEL, L.A. Freeze-fracture analysis of membrane events during early neogenesis of cilia in *Tetrahymena*: Changes in fairy-ring morphology and membrane topography

157 SAGA, Y., OKADA, H. AND YANAGISAWA, K. Macrocyst development in *Dictyostelium discoideum*. II. Mating-type-specific cell fusion and acquisition of fusion-competence

169 HOBBS, V.S., JENKINS, R.A. AND BAMBURG, J.R. Evidence for the lack of actin involvement in mitosis and in the contractile process in *Spirostomum teres*

181 THOMAS, W.E. AND ELLAR, D.J. *Bacillus thuringiensis var israelensis* crystal δ-endotoxin: Effects on insect and mammalian cells *in vitro* and *in vivo*

199 DOUGLAS, W.H.J., SOMMERS-SMITH, S.K. AND JOHNSTON, J.M. Phosphatidate phosphohydrolase activity as a marker for surfactant synthesis in organotypic cultures of type II alveolar pneumonocytes

209 BAILEY, P.J. AND HIGGINS, T.J.C. Metabolism of palmitate by anoxic and reoxygenated heart cell cultures

217 WARLEY, A., STEPHEN, J., HOCKADAY, A. AND APPLETON, T.C. X-ray microanlysis of HeLa S3 cells. I. Instrumental calibration and analysis of randomly growing cultures

231 COSSON, M.P., TANG, W.-J.Y. AND GIBBONS, I.R. Modification of flagellar waveform and adenosine triphosphatase activity in reactivated sea-urchin sperm treated with *N*-ethylmaleimide

251 CHADWICK, C.M. AND GARROD, D.R. Identification of the cohesion molecule, contact sites B, of *Dictyostelium discoideum*

267 ELLIOTT, G.C. AND JOHNSON, R.T. DNA repair in mouse embryo fibroblasts. I. Decline in ultraviolet-induced incision rate accompanies cell transformation

289 FLOWER, N.E. AND BRIERS, J.D. Particle arrays on insect nerve membranes

303 ENDERS, G.C., WERB, Z. AND FRIEND, D.S. Lectin binding to guinea-pig sperm zipper particles

331 HEATH, J.P. Behaviour and structure of the leading lamella in moving fibroblasts. I. Occurrence and centripetal movement of arc-shaped microfilament bundles beneath the dorsal cell surface

355 DICKINSON, J.R. Nucleoside diphosphokinase and cell cycle control in the fission yeast *Schizosaccharomyces pombe*
